
Information Insecurity in the Globalization Era: Threats, Governance, and Survivability

Kustim Wibowo, Indiana University of Pennsylvania
Madan M. Batra, Indiana University of Pennsylvania

EXECUTIVE SUMMARY

In the interconnected globalized world, threats to information security have become intense, dynamic, and world-wide. This paper identifies threats both internal and external to an organization, discusses damages incurred, and suggests how to govern, manage, and survive those threats from technical as well as business perspectives.

Keywords: Information insecurity, Globalization, Governance, Survivability
