I met Mr. Dawson during my internship at the Wild Things. He coordinated with me what kind of broadcast he wanted for the stream. He oversaw the broadcast and all the social media posts. Mr. Dawson also showed me how to use the score bug on the broadcast and to switch to commercial breaks, as well as putting up different graphics.

After being hired by Mr. Buccilli, he showed me all the different positions at the Wild Things as well as what I would be doing during my internship. I also helped with the things he needed here and there, but he was mainly just overseeing the press box. Tony also gave ideas for videos we should make/look for when planning on playing them on the big screen.

Mr. Sarnevitz was the main person in charge of me at the Wild Things. He made sure things got done how they are supposed to by teaching where the cameras went and how to set them up. I clipped some videos for in-game use when he needed certain clips for game nights that had themes. He knows my skills by working with others and showing dedication on the camera.
